Who we are

Supplies held in Juba, delivered to the field

Specialized Logistics Solutions (SLS) is a humanitarian logistics and WASH equipment supplier based in Juba, South Sudan, and a registered UN Global Marketplace vendor (UNGM 380716).

For more than 35 years we have supplied aid agencies and governments in South Sudan, Uganda, the Democratic Republic of the Congo, the Central African Republic and Tanzania. We buy under distribution agreements with eight manufacturers, so every product comes with the manufacturer's own specifications and certificates, ready for technical review.

Products from all four lines go on one quotation with delivery to your site. Our own people handle customs clearance, storage in Juba and Nairobi, the last mile and installation, so one supplier answers for the order from the factory to the field.
